

CVEN69MW-V4 MID WOOFER

Refined • Precise • Smooth

The CVEN69MW-V4 delivers exceptional midrange clarity and definition — the frequencies where vocals, instruments, and detail live. Designed as the backbone of sophisticated multi-speaker systems, this high-performance midrange woofer integrates seamlessly with CVEN tweeters to create a cohesive, balanced soundstage. System versatility built in. Whether you're building a full component setup or complementing small dash-mount and sail panel speakers like the CVEN2.7M-V4 or CVEN3CN-V5 concentric SQ speakers, the CVEN69MW-V4 fills the critical midrange spectrum with smooth, natural reproduction that elevates your entire system.

Model	CVEN69MW-V4
Type	Mid Woofer
Speaker Size	6.6" x 9.25" (164 x 235mm)
Peak/RMS Power	260W/130W
Impedance	4Ω
Freq. Response	45Hz-25kHz
Grille	No

BEST SOUND — Engineered for flawless bass reproduction. The critical frequencies where music connects.

PREMIUM DESIGN — VIBE's signature red and black styling. Sleek, stealthy, statement-making.

BEST TECHNOLOGY — Precision engineering meets performance. Built to integrate perfectly with CVEN systems.

BEST INTEGRATION — Perfectly built to match wideband CVEN tweeters, dash-mount mids, and full-range speakers to support complex OEM installs.

RUBBER SURROUND

The rubber surround provides an accurate bass response aiding excursion and allowing for a wider frequency response, this provides realistic playback.

FEMM MOTOR

FEMM (finite element method magnetics), the designed motor gives huge performance gains.

AUDIOPHILE

These audiophile quality speakers offer high playback with minimal distortion, these speakers are designed for those who want the most realistic audio reproduction possible.

PAPER COMPOSITE CONE

The paper composite cone allows for a lightweight efficient cone, as well as a rich accurate sound.

SCREW TERMINAL

Screw terminal for easy and secure connection to the speaker, allowing precise clamping force adjustment to the speaker wire inserted into the terminal.

WIDEBAND

The smooth wide frequency response is designed with component use in mind these speakers are designed to blend seamlessly with CVEN drivers.
